The seminar is a contribution of the international militant women's movement to the theoretical discussion about ways and goals of the liberation of women. It is a seminar of grassroots women. It is addressed to all interested women, factory workers, farmers, housewives, nurses, educators etc. You do not need to have studied or speak many languages. Every woman can participate in these discussions and contribute her diverse experiences. The theoretical processing of the diverse practical experience and life experience will help us to get a clear view in these troubled times.
