

Table 6: Hunger and DESNUTRICIÓN in the world and relative SUPERPRODUCTION of goods and food Responsible: Linda Ramos

We are convinced and believe that the World Conference of women of Base is an important contribution to the global fight against hunger, malnutrition and for the liberation of women where our proposals are as follows:

-The programmes implemented by the UN against hunger have failed completely for which reject the false figures on the same which provides that the 2015 famine fall 50% in this case 500 millions of hungry figures that it belies the F.A.O.

-To reject categorically the indiscriminate use of natural resources by transnational companies of our mother earth, which has the capacity to feed us all and all in a healthy way, for which we already shocked q there are 1 billion hungry people in the world.

-Liable to imperialism and capitalists who are the main enemies and convicted in relation to hunger, malnutrition and extreme poverty around the world.

-We express our solidarity with the struggle of peoples who stood up against hunger and poverty and reject the criminalization of protest and the persecution to their popular leaders accused as terrorists.

- Solidarity with indigenous peoples in their struggle for the right to their lands.

- Call to unite all the organizations and popular movements such as (workers, workers, farmers, peasants, teachers, teachers, students, progressive ecological movements and women's movements) to thus strengthen the fight against hunger and malnutrition.

Note: It is worth noting that the points mentioned below were discussed more no consensus.

- We demand the fulfillment of the legal framework in our countries enable us to protect our women, children as well as the entire population on the basis of good nutrition to provide proper control and monitoring.

- We totally reject the misuse of the cultivation of food which are used in the manufacture of bio-fuel.

- Promote a revolutionary socialist model that allows workers and workers attain development and welfare, so go the hunger and malnutrition in the world.

- Rejection of the imposition of GMOs in the feeding habits of the oppressed and exploited populations.
