

**Further decisions and resolutions of the 4th European Conference
in Elefsina/Athens 31st January 2015**

11	The Conference proposes to build a transnational network with the Kobanê//Rojava network to support the reconstruction and to collaborate on a long term basis. (The group working together may change over time). The coordinators are assigned to coordinate this and to make concrete suggestions for the work.
12	The European Coordinators will provide all European delegates with the presentation on the initiative and development of the World Women's Conference (including the pictures) in order to promote the World Women's Conference in Nepal. Possibly complemented by the pictures of the European Coordinators' report, showing the struggles and developments in the women's movement in recent times.
13	The Conference decides that we all have to contribute to better national as well as international organization of the women's movement. Therefore we use the three days of struggle but also the activities of the World March of Women 2015, especially the caravan's stages in Europe and the second anniversary of the collapsed garment factory Rana Plaza in Bangladesh on 24 th April. World Women's Conference and World March of Women are not opposing each other, but we cooperate and support each other.
14	The women of the European Conference propose a workshop for the World Women's Conference: "How do I organize my colleague?" This workshop is supposed to be prepared together with the Greek women and women from as many countries as possible.
15	The Coordinators are assigned to create an international flyer promoting the 2 nd World Women's Conference.
16	The women of the European Conference have proposals for further workshops at the 2 nd World Women's Conference: <i>Build up women's consciousness in the working class movement; Move and Organize grassroots women; Save mother earth!; women's liberation movements; women refugees; Fight sexism!</i>
17	The Conference proposes to initiate a mass choir at the 2 nd World Women's Conference, where all women are able to join singing. Songs connects, through songs you can get to know each other, songs express feelings, singing helps to relax and it gives us power. The women from Germany are willing to take over the responsibility.
18	The next European Conference shall take place after the 2 nd World Women's Conference in connection with the women's political council in Germany in October 2016.
19	We inform the women from other countries about important events in our own countries. We organize solidarity with resolutions and by that contribute to inform the public.
20	The 4 th European women conference decides to organize translators/interpreters in all participating countries for the WWC in Nepal, which conduct a common preparatory seminar in order to learn and agree upon the techniques, contents, vocabulary and principles of the translation/interpretation. Every country names the participants by 1 st October, the seminar will be conducted in November/December and SI will be asked to organize it and

	provide for material, technical equipment and the organization.
21	To understand environmental struggle also as women's struggle is one of the assignments we take with us from the 4 th European Conference in Athens 2015. Just like the Greek women reported about the work in the gold mines-destroying the foundations of life as well as people, or the French women informed us about the increasing number of cancer patients; let us comprehend environmental struggle as women's struggle and realize it!
22	The 4 th European Conference of worldwomen wholeheartedly supports the militant Greek women. We organize solidarity in our countries: The head of the corporations, the capitalists and the troika have to be put under pressure and the government has to be taken at their word so that the unjust measures carried out on the shoulders of the population are taken back. We demand a debt cut. All convictions of labour leaders haven to be taken back throughout the country. All group dismissals of steelworkers, of the cleaning staff of the financial department as well as of all employees in the private and public sector have to be taken back. All legislation hostile towards workers have to be taken back. All cuts of social welfare for poor families by order of the Troika and the EU have to be taken back. No government can give us our rights back if we do not fight for it. We do not have that much time and with all our might we have to build up pressure – until we will be VICTORIOUS! We are all Greek!
23	The 4 th European Conference of worldwomen had the inspiring novelty of a meeting with nine Greek women's initiatives – from the steelworker's women in Aspropirgos, the cleaning women from Athens to the women's solidarity house/shelter in Thessaloniki. It made obvious: Especially in the deepest crisis significant new women's initiatives and struggles have developed. But they also decided: We have to connect on a long-term basis, in an organized way to enfold our complete power. And they took the first joint steps together with us, the worldwomen. For all Europe applies: Let us overcome the isolation of women – get organized! Let us overcome the fragmentations by breaking down the separation because of party political or world view borders in an ueberparteilich way (non-party associated). Let us strengthen ourselves by lasting and sustainable transnational coordination in the worldwomen's process. Let us build up close alliances, e.g. worldwomen and the World March of Women, especially the caravan from Kobane to Lisbon. Women of the world, empower yourselves by organizing!
